

PROTECT-CH

Prophylactic Therapy in Care Homes Trial

Help the fight against COVID-19

Your care home is part of the **PROTECT-CH** trial. The aim of the trial is to find out if there are any medications that can prevent or reduce the spread and impact of COVID-19 in care homes.

How can you help?

If you decide to take part in the trial, you will be asked to continue with your usual care plus taking a trial medication, or just continue with usual care alone. Information will be collected about whether this makes a difference to your health.

Where can I find more information?

Talk to staff at your care home and please visit:
<https://www.protect-trial.net/>

The trial is funded through the National Institute for Health Research (NIHR) Health Technology Programme (NIHR 133443).
